

**IF LUBRITE® WASN'T
THE WORLD'S MOST
PROVEN HIGH
COMPRESSION
BEARING, THESE DAMS
WOULDN'T RELY ON IT**

It is a fact that LUBRITE and only LUBRITE can demonstrate a sixty year history of proven low friction, no-maintenance marine operation. Over 1200 Hydro/Electric projects rely on LUBRITE in Tainter and other gates, penstock supports, sheaves, linkages, cranes and valves. LUBRITE is unaffected by temperature extremes, immersion or corrosion. Sixty plus years of bearing experience has given LUBRITE engineers a big headstart on designing your project.

Write or call for free design consultation and technical/specification brochures.
